Subject: RE: EPA 2017 Well Sampling Data
Attachments: 2017 October Sampling_NOPII.docx

Sorry, I did miss one on the No PII spreadsheet. The S01 and S02 were both done in October 2017 and in May 3, 2018 testing, but S03, S04, or S05 were only done in October 2017, they are not the same as the May 3 sample IDs.

Sincerely,

Cheryl Burdett

Subject: RE: EPA 2017 Well Sampling Data

Thanks, Chuck.

We have two questions concerning the report and table:

1. The text in the report describes 13 private wells being tested by EPA during October 23-25, 2017. The attached spreadsheet contains only 12 results, why the discrepancy?

From the report, "On October 23-25, 2017, EPA had initially investigated pollutants in northeast Juneau County by sampling 13 private wells in the Study Area. At that time, EPA's sampling showed

that of the 13 private wells, six had levels of nitrates that exceeded the drinking water standard of 10 milligrams per liter (mg/L).”

2. Are the 5 private well samples with Sample IDs S01 through S05 from October 2017 the same private wells with Sample IDs S01 through S05 collected in May 2018?

From the report, “On May 3, 2018, EPA collected drinking water samples from 5 private wells.”

Subject: EPA 2017 Well Sampling Data

Jim,

In accordance with his request, I forwarded this 2017 EPA well sampling data to David Crass today. I will provide these results, along with the names and addresses of the well owners, to the Juneau County counsel. Let us know if WDNR has any questions about this data.

Chuck
